

Flex-A-Door®

SLIDING GARAGE DOOR

The unique B&D Flex-A-Door® is the perfect alternative when you are looking to replace your existing tilt door, or in situations where you have restricted headroom in your garage or carport.

Flex-A-Door features the famous B&D Roll-A-Door® curtain, fitted on a curving track, so the curtain lifts from a vertical position up into a horizontal position, close to the ceiling - providing a clean, neat appearance on both the outside and inside.

Flex-A-Door®

SLIDING GARAGE DOOR

AESTHETICS

- An extensive range of colours to choose from, enough choices to suit any exterior.
- Roll-A-Door curtain for a clean, neat appearance.
- Stylishly designed centre lift lock.
- Hidden extension spring providing a tidy, uncluttered finish.
- Flex-A-Door fits behind the opening and does not protrude forward, like jamb or canopy type tilting doors. This means the door can be fitted to openings with unusual shapes, such as arches, etc.
- In situations where a Flex-A-Door and a Roll-A-Door may be installed next to each other, or in close proximity, the two doors match.

SAFETY

- Extension springs enclosed and above head height – well out of the reach of children.
- No moving brackets or door supports which could act as finger or arm entrapments.

EASE OF OPERATION

- Limited headroom required above the walk-in height requirement, with a Roll-A-Door curtain, moving like a sectional door.
- Nylofelt® running strips for effortless sliding action.
- Door can be left open at any height, giving the added convenience of allowing the door to be partially opened for ventilation, while providing privacy when working in the garage.

WEATHER PROTECTION

- Colorbond steel, our preferred supplier, to stand up to the harsh Australian climate.*
- A weatherseal with deep cushioning helps restrict entry of water and leaves. On slightly uneven floors it reduces the gap for a better fit.
- A curtain that fits behind the opening and runs on a track, so Flex-A-Door won't blow shut in the wind like a tilt door can, and Flex-A-Door also restricts the wind from blowing through the entry way as can happen with tilt doors, which fit within the opening and therefore have a gap on each side.

SMOOTH, QUIET OPERATION

- Nylofelt® running strips and nylon rollers with bearings ensuring your door slides up and down with minimal effort.
- Plastic insert in the horizontal track providing smooth quiet operation.

STRENGTH AND DURABILITY

- Springs designed to exceed the Australian Standard for garage doors – 20,000 cycles.
- The Roll-A-Door steel curtain providing a more rigid, stronger door.

WARRANTY

12 month warranty for complete door and parts in domestic and industrial/commercial applications, surface (excludes salt corrosion).

*As with all types of garage doors, for optimal trouble free performance and safety, we recommend you have your door serviced annually.

Automation.

It is important to partner your B&D® door with a genuine B&D® automatic opener. Designed to exacting standards in Australia and made to work in unison with your door year after year.
